

Tubular Peyote Rope

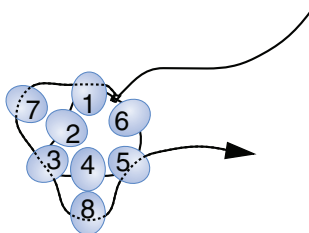

BY BONNIE BROOKS

Making the tube

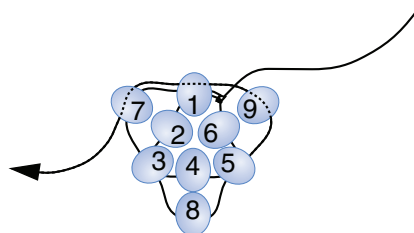

- 1 Thread a beading needle with a comfortable length of thread.
- 2 Pick up 6 beads. Tie them into a circle using a square knot, leaving a 10" tail.
- 3 Exit through bead 1.

- 4 Work in peyote stitch around the circle: Pick up bead 7, skip bead 2, and pass through bead 3. Pick up bead 8, skip bead 4, and pass through bead 5.

- 5 Pick up bead 9, skip bead 6, and pass through bead 1. Step up to start the next round by passing through the first bead of this round again (bead 7).

Snug the beads up in this round to begin the tube shape.

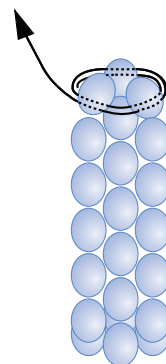

TIP:

Step up after stitching the third bead in the round.

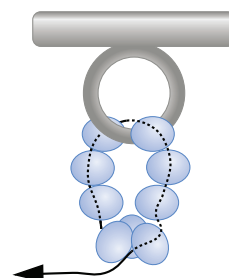

- 6 Repeat Steps 4 and 5 until the tube is the desired length.

Finishing; adding a clasp

- 7 There are three high beads in this round. Pass through the three high beads twice and snug them up to pull those three beads into a cone shape.

- 8 Pick up three beads, half of the toggle clasp and three beads. Pass through the three beads in the cone shape.

Pass through the beads added in this step again to reinforce. Knot the thread ends securely, weave ends into piece, and trim.
